PROFILE

On-track First Class Economics student who builds faster, cleaner analytical workflows across finance, data and valuation. Proven through automated reporting, market research, Python strategies and investor-style modelling, I turn complex information into decision-ready recommendations. Targeting analyst roles across banking, finance and consulting.

EDUCATION

University of Birmingham

Sep 2023 – Present

- BSc (Hons) Economics – Current Grade: First Class | Expected Jul 2026.

WORK EXPERIENCE

Young Asians in Finance – Operations Specialist (Current Volunteer)

Sep 2025 – Present

- Ran multi-channel outreach across LinkedIn and Instagram, segmenting audiences, drafting communications and tracking responses to deliver 35% engagement growth and 25% CTR uplift.
- Managed the finance and investment-banking event pipeline end to end, coordinating bookings, speaker briefing notes and campaign tracking to improve registration conversion and on-time delivery.
- Produced briefing packs, stakeholder communications and event-day materials across 6+ finance events, maintaining accuracy and reducing coordination delays across campaigns.

Nationwide Building Society – Finance Division, Finance Intern

Jul 2025 – Aug 2025

- Built recurring Excel and Power BI reporting from multi-system finance data, strengthening director-pack accuracy and performance monitoring while cutting month-end reporting cycle time by 12%.
- Reconciled 400+ finance records and remediated 100+ missing fields, lifting data completeness to 97% and making board-level outputs traceable to source records.
- Designed a self-check Excel control model that corrected 60+ board-pack entries before sign-off, tightening governance and reducing reporting rework by approximately 20% across three cycles.
- Led a 4-person team through a live business challenge, synthesising input from 5 stakeholder groups into a structured finance-led recommendation rated best-in-cohort by senior leadership.

Oxbridge Analytics & Consultants Ltd – Research & Strategy Assistant (Volunteer)

Jun 2024 – Aug 2024

- Synthesised market, ESG and operational research across 10+ client workstreams, structuring fragmented inputs into decision briefs using hypothesis-led analysis for senior stakeholder discussions.
- Cleaned and structured 1,500+ research data points into reference datasets, supporting scenario planning, commercial prioritisation and investment-style recommendations across client engagements.
- Analysed supply-chain and sustainability KPIs for a decarbonisation workstream, identifying commercial and operational levers with the strongest emissions-reduction impact and practical feasibility.

Fintech Society – Quantitative Analyst

Oct 2023 – Mar 2024

- Designed and back-tested 3 Python/pandas trading strategies across 36 months of equity and ETF price data, testing signal durability and return consistency across changing market regimes.
- Optimised entry, exit and position-sizing logic, lifting back-tested Sharpe ratio 25% and reducing maximum drawdown 7%; presented risk-return trade-offs to a 5-person quant team.

QUANTITATIVE PROJECTS & MARKETS

CFA Level 1

Currently Studying (Nov 2026)

- Studying equity valuation, fixed income, derivatives, financial reporting and portfolio management to build technical fluency across markets, investment analysis and risk management.

Meta Data Analyst Professional Certificate

Feb 2025 – Current

- Built 3 Tableau dashboards and 2 Python/pandas analyses across multi-source datasets, using SQL, EDA and KPI design to improve data cleaning, dashboarding and stakeholder-ready insight.

Self-Directed LBO Model – UK Energy Infrastructure

Sep 2025

- Built a 5-year, 3-statement LBO for a hypothetical £45m EV UK energy infrastructure investment, modelling 2.4x MOIC and 22% IRR across three demand scenarios, then wrote a 5-part IC memo covering thesis, risks and exit.

HSBC & J.P. Morgan Virtual Experience + UIUC M&A Specialisation

Aug 2024

- Completed Bloomberg's flagship markets training covering economics, currencies, fixed income and equities, direct, hands-on grounding in the terminal used across trading desks.

SKILLS & EXTRA-CURRICULAR ACTIVITIES
